

## Peru Oil Study

### Geochemistry and Exploration Significance Of Crude Oils and Oil Seeps from Peru

GeoMark Research, Inc. has completed a detailed, country-wide investigation of the geochemistry of crude oils and surface seeps from Peru. The study involves the detailed analysis of 192 crude oil samples representing every sedimentary province.

This study provides valuable insight into:

- The number of petroleum systems active within the regions,
- The character of these systems,
- The relative importance of the differing systems and
- The overall potential of the various regions.

This interpretive assessment is finished and ready for delivery as a PDF and ArcGIS product. Data used in this interpretation is available for a separate subscription fee. Please contact GeoMark research for more information.

**Samples: 192 Oils**  
**151 Total Wells**
